Import structure

1 · Configure | 2 · Review proposal | 3 · Apply → receipt

Close Esc

SOURCE

Template | Custom outline — Built-in specialization, course and module packs

Template

Coursera specialization or certificate

Epic with course projects, module sections, supplied tasks

Attach to

New epic (root)

Where the new structure will live

CONTENT

Quick fields | Raw JSON | Upload .json — Download example JSON

Program title required

Program or learning-path title

Provider

Org or author (optional)

Platform

Platform name (optional)

Source URL

https://… (optional)

Operator notes

Short note for you — not shown as task text

Module and course scaffolds still include sample tasks. Edit them in Raw JSON or upload a full curriculum export.

OPTIONS

☐ Skip optional items in the preview

WHAT THIS TEMPLATE CREATES — from example scaffold

```
▾ Epic · [Program title]
  ▾ Project per course
    ▾ Section per module
      · Supplied tasks (video, reading, assignment)
```

Exact counts, durations and due dates appear after you propose. Applying uses an idempotency key, so re-running the same import won't duplicate tasks, and it returns a receipt.

Nothing is created yet. Proposing builds a preview to review.

[Kubernetes] High-Level Overview – Assessment

Ready · P4 · 15m · assignment

PLACEMENT

Mon Oct 12 · 6:00–6:15 PM movable — placed by scheduler · run Mon 8:02

☐ **Pin this time** ⇧P
Pinned items are never moved by the scheduler or Assist. Leave unpinned to let them re-place it when the week changes.

Why this slot

- Inside the Coursera learning time window
- Before its ● due date, Tue Oct 13
- Earliest free 15m after higher-priority tasks

Reasons are illustrative; they'd come from the recorded evaluation.

Move manually... Unschedule

DATES

●	Due	When it's expected	Tue Oct 13
